

Moving Image Review Online (MIR Online)
Greenstone3 Screencast Demonstration, 22 May 2008

14 minute demo uses two issues of *Moving Image Review* and additional items. Questions, contact Teeter Bibber, tbibber@mac.com

Moving Image Review digital library architecture, which allows you to search in the digital library collection of MIR issues, articles, moving images, and outside links.

00:45 min.	Download & Gather: identify objects for collection (local or distributed; analog or born-digital); attach objects' metadata.
1:10 mins.	Enrich: metadata sets for original and digital objects
2:15 mins.	Design: <u>plugins</u> for production of digital objects such as <u>PDFs</u> . Search indexes: by various elements, thesauri. Browse lists, e.g. function to organize and present MIR by issues and by NHF Collection based on metadata set element
3:50 mins.	Format & Create: input and build options and general format of Collection
4:25 mins.	Build: ingesting of various files and metadata, creating digital objects by integration of other applications such as MS Word.
9:15 mins.	Full text search created with "hash" function.
10:50 mins.	Preview: collection in browser; Talbot and Barbara Hackett Collection video clips.
11:15 mins.	<u>PDFs</u> link to video of Hackett Collection at Windows on Maine.
12:15 mins.	Local copy of video, searchable with metadata for each clip.
12:52 mins.	Enriched <u>PDFs</u> of pages, links to other resources, e.g. Union Historical Society Website.
13:45 mins.	Search & Retrieve: search on "Movie Queen" with resulting articles. Search terms are highlighted in results.
